DETAILED ACTION

Election/Restrictions

1. Applicant has traversed the restriction requirement, arguing that all of the recited compounds belong to a recognized class of chemical compounds as defined at MPEP 1850. This passage states, in part:

In paragraph (B)(2), above, the words "recognized class of chemical compounds" mean that there is an expectation from the knowledge in the art that members of the class will behave in the same way in the context of the claimed invention. In other words, each member could be substituted one for the other, with the expectation that the same intended result would be achieved.

In view of this admission by applicant, the restriction and election requirements are WITHDRAWN.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for methyl substituents on the cycloalkyl furans, does not reasonably provide enablement for any and all conceivable substituents. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. The claims should be amended to recite only the substituents which for which applicant can demonstrate clear possession at the time of filing.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 3 provides for the use of a compound, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 3 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

6. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the incorporation of a compound of formula (I)...into what? The examiner recommends that the claim be amended to recite the presence of a base material, as in claim 5.

Allowable Subject Matter

7. Claims 1, 2 and 4-15 would be allowable if the rejections under 112 1st and 2nd paragraph were overcome.

8. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art of record is the Walling et al. reference cited by applicants. The reference discloses the intramolecular cyclization of delta-chloroalcohols to form n-alkyl tetrahydrofurans. The reference does not disclose or motivate the use of this cyclization reaction to form branched-alkyl tetrahydrofurans, as required by the instant claims.

9. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Mr. Harold Pyon, may be reached at (571) 272-1498.
